Nearly identical requests, different source labels

Normal — source label 000

CSV index 175088 | pool

```
GET /blog/index.php/wp-json/oembed/1.0/embed?format=xml&url=http%3A%2F%2Ftest-site.com%2Fblog%2Findex.php%2Fv
itae-dolores-quidem-possimus-aut-voluptatibus%2F
HTTP/1.1
```

SQL Injection — CAPEC-66

CSV index 174425 | pool

```
GET /blog/index.php/wp-json/oembed/1.0/embed?format=xml+AND+1%3D1&url=http%3A%2F%2Ftest-site.com%2Fblog%2Find
ex.php%2Fvitae-dolores-quidem-possimus-aut-voluptatibus%2F
HTTP/1.1
```

Only request-target differs: format=xml → format=xml+AND+1%3D1

URI character similarity: 96.84% | Same method, protocol, headers and empty body

Display wraps URI lines. Full original field values are in the report and evidence JSON.
Motivating illustration; embedding similarity and retrieval errors have not been measured.
